Keywords: Budget organizations, financial resources, diversification, budget outside funds, public-private partnership, paid services, financial governance, transparency, digitalization, skills increase, economic efficiency.

Introduction

Budget organizations of the state socio-economic policy done in increasing important institutional basis to be service They do. activity mainly state budget funds at the expense of funded, but the last global economic changes and national of the economy development needs because of from the budget outside financial resources attraction to do and from them effective use issue increasingly current become is going on. Uzbekistan In the Republic budget organizations financial independence provide, state to the budget addition reduction and services quality increase for the purpose financial resources diversification to do strategies important importance profession This article is budget in organizations financial resources formation, diversification to do and effective management scientific basics, practical problems and improvements the ways wide illuminates. Financial resources diversification to do budget only state organizations to the budget from relying give up passing by, different income sources attraction financial by doing to stability to achieve means. Such sources between paid revenues from services , private sector with cooperation , international and local grants , sponsorship aid , charity organizations with cooperation , as well as the organization's internal resources profit gained through optimization important place Uzbekistan in these circumstances, these sources organizations financial independence provide , new projects financing , logistics the base reinforcement and services quality in increasing important tool as For example , education in the field state supreme education institutions contract education services , additional courses or

remote education involvement through programs to be done funds organizations income base expands . Just like so , health storage in the field additional medical services , modern diagnosis and treatment methods current from the budget by outside funds is being formed . From the budget outside resources of formation important from directions one public-private PPP projects . PPP model budget to organizations private investments attraction to do , infrastructure objects modernization to do and new technologies current to grow opportunity For example , health storage in institutions modern medical equipment purchase to do or education in institutions innovative laboratories organization Financing through PPP projects possible . With this together , international grants and sponsorships assistance organizations material base in strengthening important role In particular , international organizations by presented attainable grants education , health conservation and social services in the field projects done in increasing big help gives . Local sponsorship assistance and especially private sector with in collaboration with organizations social projects financing opportunities expands .

However , the budget in organizations financial resources diversification in making and managing one row problems First , the regulatory and legal base often from the budget outside funds attraction in making and spending hard restrictions For example , paid revenues from services spend according to placed restrictions organizations financial resources effective management opportunities Secondly , the organization of employees financial management , marketing and project management in the field enough experience and qualifications has not being potential income from sources complete use not to receive take Third , financial in management transparency and accountability shortage organizations internal financial to discipline negative impact Fourth , the budget organizations services market requirements complete suitable absence their competitiveness reduces , this and additional income sources formation opportunities limits .

These problems eliminate systematic and strategic approach to approaches are required . First of all , regulatory and legal the base reform budget by making to organizations more financial freedom to give necessary . In this paid revenues from services spend according to restrictions mitigation , PPP projects incentive and private sector with cooperation expansion important importance For example , in the legislation budget to organizations own their income known one to the border independent accordingly management the right by giving them flexibility increase possible . With this together , privately sector with cooperation tax for incentive benefits and other financial encouragement mechanisms current to be necessary .

Secondly , the budget organizations of employees qualification increase and them modern financial management , marketing and project management according to teaching important . For this purpose special training programs , seminars and international experience exchange platforms organization to be For example , international experience budget through learning organizations grant writing staff , project financing and digital marketing strategies working exit according to to skills has to be possible . Such qualification increase programs organizations potential income from sources effective to use help gives .

Third , financial management system modernization resources through digitization and effective use provide necessary . Modern information from technologies used without income and expenses into account to take transparent system current as well as financial resources in planning and monitoring digital from platforms use expansion For example , using blockchain

technologies from the budget outside of funds transparent in a way into account to be taken and from them use observation opportunity creation possible . Such systems not only financial discipline increases , maybe organizations also strengthens its reliability .

Fourth , the budget organizations service quality increase and market requirements by adapting them competitiveness provide necessary . Paid services in the market competition intensifying going one in the circumstances , organizations own services diversification to make and quality additional by increasing income sources formation possible . For example , education in institutions modern professional programs , remote courses or international to certificates has was training programs current additional by adding income attraction to be done possible . Just like so , health storage in institutions modern diagnosis and treatment methods current patients through flow multiplication and addition income sources formation possible .

From this outside , budget organizations financial resources diversification in doing international from experience use important importance For example , developed in countries budget organizations own activity donation for funding funds , crowdfunding platforms and social impact from investments wide uses these experiences in Uzbekistan as well current budget through organizations new financial sources attraction to do possible . For example , social projects crowdfunding for financing platforms create or charity organizations with cooperation expansion organizations financial opportunities increases .

Conclusion as in other words , budget in organizations financial resources diversification to do and effective management state to the budget addiction reduction , organizations financial independence supply and services quality in increasing important importance has . Normative and legal the base reform to do , employees qualification increase , financial management digitization , services quality improvement and international from experience use such as strategic approaches to these goals in reaching effective These measures will be not only budget organizations economic efficiency increases , maybe Uzbekistan socio-economic development and on a global scale competitiveness also contribute to strengthening Addictive .
